

Epson Expression® 10000XL

Color Flatbed Scanner

The high performance 2400 dpi, large-format scanner for professional photographers and graphic artists.

With 2400 dpi resolution—higher than any other B-size flatbed scanner available today—plus a 3.8 Dmax and 48-bit color, the Epson Expression 10000XL offers everything professional photographers and graphic artists require for high-quality, large-volume scanning.

A reliable performer that's sure to increase productivity, this hard-working scanner features Epson's exclusive ColorTrue® II Imaging System, which combines superior image processing, a Xenon lamp, and Epson MatrixCCD™ technology for enhanced colors and pinpoint registration. Its 3.8 Dmax delivers a broad dynamic range with excellent shadow detail. And, an AutoFocus optics system, when activated, adjusts the focus and captures clear, precise images every time.

The Epson Expression 10000XL scans virtually anything, including reflective media up to 12.2" x 17.2". And, it's available in two configurations—a Photo model, with a transparency unit for scanning transparencies up to 12.2" x 16.5"; and a Graphic Arts model. Each includes both USB and FireWire® (IEEE 1394) connectivity for most Windows® and Macintosh® systems. There's also an optional network card.

Best of all, these durable scanners speed through every task to digitize images quickly and easily. They even offer an optional automatic document feeder for multiple-page scanning. For increased productivity and remarkable results in professional graphic arts and photographic applications, the solution is simple—the Epson Expression 10000XL.
